Education

Marist College

Bachelor of Computer Science, Software Development, Minor Applied AI

Expected Graduation: May 2027

Poughkeepsie, NY

- **GPA:** 3.92/4.0
- **Courses:** Software Dev I & II, Algorithm Analysis & Design, Database Management, Discrete Math, Calculus, System Design, Internetworking, AI Lit, Theory of Programming Languages
- **Awards and Honors:** Presidential Scholarship, Dean's List (Spring 2024 - Spring 2025)

Technical Skills

Languages: Python, JavaScript, HTML5, CSS3, Java, SQL

Developer Tools: Git/GitHub, Jira, API/REST, Visual Studio, Large Language Models (LLM's), Agile, Swagger

Libraries/Frameworks: Django, ReactJS, PostgreSQL, MERN stack, Object-Oriented-Programming (OOP)

Relevant Experience

Travelers Insurance

EDP Software Intern

Jun 2025 – Present

Hartford, CT

- Integrated **Swagger UI** and wrote **OpenAPI** specifications to streamline endpoint testing for RMIS MVP
- Built an **Express** server to route Swagger requests to **Lambda** handlers, enhancing backend modularity
- Collaborated in a **MERN stack** team and used **ReactJS**, taking on user stories that were later pushed to the main code

Marist IT

Help Desk Technician

Sep 2023 – Dec 2023

Poughkeepsie, NY

- Provided technical support for the college community's personal **Windows and MacOS** devices.
- Responded to inquiries for **software assistance**, leading to a **95% resolution** rate within **24 hours**.
- Recorded common technical problems and solutions, which reduced repeated issues by **20%**.

Leadership Experience

Cramora AI | [Landing Page](#)

Founder & CTO

May 2025 - Present

Miami, FL

- **Drove 100% of technical strategy** and execution, building a scalable AI-powered last-minute study platform using **Django**, **PostgreSQL**, **OpenAI's API**, and **Stripe**, designed to help students study
- Engineered a high-converting landing page, driving **150+ sign-ups** to Cramora AI's pre-launch waitlist
- Designed and built **AI-powered** study features, implementing server-side **LLM API** calls (**gpt-4o**)

Relevant Projects

Auction Marketplace [Source Code](#)

Django | Python | SQLite

- Built a full-stack auction web application, using **Django**, enabling live bidding and watchlist features
- Designed relational database models in **3NF** using **SQLite** to manage users, listings, bids, and comments

Email Client [Source Code](#)

Django | JavaScript | SQLite

- Programmed a full-stack email application using **Django** and **JavaScript**, implementing asynchronous email sending and mailbox updates
- Designed **RESTful API** endpoints to handle email creation, retrieval, and archiving logic

Activities

Varsity Athletics

Oarsman

Sep 2023 - Jan 2025

Poughkeepsie, NY

- Marist College Varsity Men's Crew - **20+ hours** per week of training, practice, and competition
